SAOS Customer Dashboard

Client-facing portal for SAOS (Systack Agent Orchestration System) customers.

Files

FILE	PURPOSE
<code>index.html</code>	Full client dashboard — Chat, Dashboard, Services, Tasks, Docs tabs
<code>api.py</code>	Flask API serving client-scoped fleet data + real-time chat
<code>n8n-chat-bridge.json</code>	n8n workflow for bridging chat messages to agent responses
<code>schema.sql</code>	Database schema for chat + auth tables
<code>README.md</code>	This file

Quick Start

```
# Start the API (also serves index.html statically)
python3 api.py --port 8768

# Or use Flask directly
flask --app api.py run --port 8768

# Open in browser
open http://localhost:8768/
```

API Endpoints

Authentication

ENDPOINT	METHOD	DESCRIPTION
<code>/api/auth/login</code>	POST	Get Bearer token from client_id
<code>/api/auth/logout</code>	POST	Revoke current token
<code>/api/auth/me</code>	GET	Get current client info

Portal

ENDPOINT	METHOD	DESCRIPTION
<code>/api/portal/health</code>	GET	Health check (no auth)
<code>/api/portal/status</code>	GET	Fleet overview + client record

ENDPOINT	METHOD	DESCRIPTION
/api/portal/tasks	GET	Task history (last 50)
/api/portal/agents	GET	All agent states (no auth)
/api/portal/client	GET	Single client account details

Chat

ENDPOINT	METHOD	DESCRIPTION
/api/chat/conversations	GET	List conversations for client
/api/chat/conversations	POST	Create new conversation
/api/chat/conversations/{id}/messages	GET	Get messages
/api/chat/conversations/{id}/messages	POST	Send message
/api/chat/conversations/{id}/close	POST	Close conversation
/api/chat/poll	GET	Poll for new messages/tasks
/api/chat/webhook/agent-response	POST	Webhook for agents to reply

Dashboard Tabs

- Chat** — Real-time messaging with AI agents. Create conversations, send messages, receive agent responses.
- Dashboard** — Status metrics (active/pending/completed tasks, unread messages), agent fleet grid with roles.
- Services** — **Tier-specific** service cards showing exactly what the client is paying for, infrastructure details, support SLA.
- Tasks** — Full task history table with status pills (DONE/PENDING/FAILED/RUNNING).
- Docs** — Tier-filtered documentation (Base + Enterprise/Private get extra deployment guide).

Auth

Token-based authentication using `Authorization: Bearer <token>` header.

- Tokens are generated on login and stored in browser localStorage
- Tokens expire after 30 days
- Current fallback: `?client_id=` query parameter (for direct testing)

Service Tiers

The dashboard adapts content based on the client's `tier` field:

TIER	PRICE	WHAT'S SHOWN IN SERVICES TAB
personal	\$49/mo	Email, calendar, tasks, notes, research
personal+	\$99/mo	Above + multi-device, voice, expense tracking

TIER	PRICE	WHAT'S SHOWN IN SERVICES TAB
business	\$299/mo	Invoice processing, lead qualification, team Slack, reports
enterprise	\$799/mo	Above + on-premise, HIPAA, white-glove, 4hr SLA
private	\$799/mo	Document extraction, invoice, support, compliance audit
accelerate	\$249/mo	Invoice, support, data entry, lead qual, reports

Design

- Dark theme matching Systack brand (`#001a2d` base)
- Accent: `#00a1db` / `#00c5e0` (Systack cyan)
- Responsive grid layout
- Real-time polling every 5 seconds for chat updates
- Tab-based navigation with sticky header

External Access

- **Local:** `http://localhost:8768/`
- **Tailnet:** `https://phillips-macbook-air.tail573d57.ts.net/dashboard/`
- **Security:** Tailscale VPN required for external access

Related

- Internal fleet dashboard: port 8765
- Invoice dashboard: port 8766
- SAOS site: `systack-site/saos/index.html`
- Fleet agent pages: `fleet/` directory

Version History

VERSION	DATE	CHANGES
v1.0	2026-06-22	Initial dashboard with Overview, Agents, Tasks, Account tabs
v2.0	2026-06-24	Complete rebuild: Chat, Dashboard, Services, Tasks, Docs tabs. Tier-specific content. Real-time chat. Token auth.
