5. Troubleshooting

PROBLEM	SOLUTION
“Can’t reach server”	Check Tailscale is connected (toggle off/on)
“Invalid PIN”	Double-check your PIN. Contact support to reset if needed.
“Page not loading”	Ensure you’re using <code>https://</code> not <code>http://</code>
“Layout looks broken”	Refresh page (pull down on Safari, tap refresh on Chrome)
“Buttons too small”	Pinch to zoom is disabled — use landscape mode for larger view
“Keyboard covers input”	Tap anywhere outside keyboard to dismiss, then tap input again
“Session expired”	Log in again. Sessions last 30 days of inactivity.

6. Tips for Best Mobile Experience

- **Bookmark the dashboard** for one-tap access
 - **Add to home screen** for full-screen app-like experience
 - **Use landscape mode** for wider chat view
 - **Keep Tailscale running** in background for instant access
 - **Pull to refresh** if data seems stale
 - **Tap and hold** on links to open in new tab
-

7. Security Notes

- **PIN never transmitted in plain text** — encrypted over HTTPS
 - **Session tokens stored securely** in browser localStorage
 - **Logout clears all sessions** — use if device is shared
 - **No public access** — requires Tailscale connection
 - **Auto-lock recommended** — set device passcode for extra security
