1. No Orders Received

Cause:

- Webhook not firing
- Frontend issue

Fix:

- Test webhook manually with curl
- Check CORS headers on webhook response
- Verify frontend POST URL matches webhook path
- Check n8n workflow is Active

2. Payment Link Not Working

Cause:

- Square API failure

Fix:

- Verify Square API credentials in n8n
- Check `SQUARE_ACCESS_TOKEN` is valid
- Check `SQUARE_LOCATION_ID` is correct
- Regenerate link by resubmitting order
- Check Square API status: squareup.com/status

3. Payment Completed but No Order

Cause:

- Square webhook delay or outage

Fix:

1. Verify payment in Square Dashboard
 2. Manually notify kitchen with order details
 3. Retry webhook if possible
 4. Check n8n confirmation workflow is Active
 5. Check Square webhook subscription is configured
-

4. Email Not Sending

Cause:

- SMTP issue

Fix:

- Check SMTP credentials in n8n
 - Verify Gmail access (app password may be revoked)
 - Check spam folder for missing emails
 - Test SMTP connection from n8n
 - Verify email node configuration (HTML field starts with `= )`)
-

5. Incorrect Totals

Cause:

- Schema mismatch (cents vs dollars)

Fix:

- Ensure cents conversion in Normalize node
 - Validate tax calculation (9.52% AR rate)
 - Check floating point tolerance ($\pm \$0.02$)
 - Verify Square receives amounts in cents
-

6. System Crashes in Code Node

Cause:

- Unsupported JavaScript syntax

Fix:

- Remove ES6 spread operators (`...obj`)

- Replace with `Object.assign({}, obj1, obj2)`
- Use simple function expressions (no arrow functions in some contexts)
- Wrap `JSON.parse` in try/catch
- Check n8n Code node for syntax errors in execution log

7. Attachments Not Found (Invoice Crossover Issue)

Cause:

- Wrong binary key reference

Fix:

- Use `attachment_0` (NOT `attachment_`)
- Verify binary key matches n8n node output
- Check IMAP format is “resolved” (not shallow)

Quick Reference

SYMPTOM	FIRST CHECK	ESCALATE IF
No orders	n8n workflow Active?	> 1 hour during business hours
Payment fails	Square credentials valid?	> 3 consecutive failures
No confirmation	SMTP credentials valid?	> 5 failed sends
Page down	DNS resolving? GitHub Pages up?	> 30 min downtime
Wrong totals	Cents conversion working?	Every occurrence
