SAOS Dashboard User Guide

Document ID: SAOS-UG-v4.0

Version: 4.0

Status: Active

Date: 2026-06-29

Support: support@systack.net

What’s New in v2.1 (June 29, 2026)

New Features

FEATURE	DESCRIPTION	WHERE
Integration Health	Real-time monitoring of PostgreSQL, n8n, Tailscale, BlueBubbles, Ollama	Dashboard tab
Universal Search	Search across tasks, messages, and activity	Nav bar

FEATURE	DESCRIPTION	WHERE
Usage Metrics	Monthly task counts, agent hours, storage, n8n runs	Dashboard tab
Trust Features	Data residency, SLA, support paths, billing, changelog	Dashboard tab
Data Export	ZIP download of all client data	Settings tab
Security Hardening	Rate limiting, CORS, token revocation, audit log	Backend

Security Enhancements

- **Rate Limiting** — 5 login attempts per 5 minutes per IP
- **CORS Restriction** — Only authorized domains can access the API
- **Token Revocation** — Changing PIN immediately revokes all active sessions
- **Audit Logging** — All auth events, PIN changes, data exports logged
- **Server-side Token Invalidation** — Logout properly invalidates tokens

1. Getting Started

First-Time Login

1. Obtain your **Client ID** and **Temporary PIN** from your SAOS administrator
2. Navigate to your dashboard URL
3. Click **“First-Time Setup”**
4. Enter Client ID + Temporary PIN
5. Choose a permanent PIN (4-10 digits)
6. Activate and log in

Regular Login

1. Enter your **Client ID** and **PIN**
2. Click **Login**
3. You’ll receive a Bearer token (valid 30 days)
4. Token is stored in browser localStorage

Forgot PIN

1. Click **“Forgot PIN”** on login screen
2. Enter your Client ID and registered email
3. A temporary PIN will be issued (24-hour expiry)
4. Contact your SAOS administrator to receive it
5. Use First-Time Setup flow to set a new PIN

2. Dashboard Tab

Overview Metrics

The Dashboard tab displays:

METRIC	DESCRIPTION
Active Tasks	Tasks currently being processed by agents
Pending	Tasks awaiting agent assignment
Completed	Total tasks completed (all time)
Unread Messages	Unread messages from agents

Usage Metrics (This Month)

METRIC	DESCRIPTION
Tasks Completed	Tasks completed this calendar month
Agent Hours	Total agent compute time (last 30 days)
Deliverables	Count and storage size of deliverables
n8n Runs	Automation runs this month vs tier limit
Active Agents	Currently online agents vs tier limit

Integration Health

Real-time health monitoring of 5 core services:

SERVICE	ICON	WHAT IT DOES
PostgreSQL		Database connectivity check (SELECT 1)
n8n		Automation engine health check
Tailscale		VPN mesh network status + peer count
BlueBubbles		iMessage bridge connectivity
Ollama		Local AI model server status

Each integration shows: - **Status** (green/yellow/red) - **Response time** in milliseconds - **Details** (error message or success info) - **Last check** timestamp

Click  **Refresh** to re-check all integrations.

Setup Progress

Shows the percentage of services that have been set up for your account. Based on `service_setup` tasks completed vs total.

Trust Features

Six sections provide transparency:

- 1. **Data Residency** — Server location, encryption (AES-256 at rest, TLS 1.3 in transit), compliance status

2. **Scope** — What Systack manages vs what you control
3. **SLA** — Uptime (last 30 days), incident count, response time commitment
4. **Support** — Your tier's support channel, escalation path, emergency contact
5. **Billing** — Plan, monthly price, next billing date, payment method, invoice history
6. **Changelog** — Recent dashboard updates with dates

3. Chat Tab

Conversations

- **Create** — Click “+” or “New Conversation” button
- **Send** — Type message and press Enter or click send
- **Auto-task** — Messages containing keywords (create, build, fix, etc.) auto-create tasks
- **Close** — Click “Close Conversation” to end a thread

Messages

- Agent messages appear in real-time
- System messages show task creation/completion
- Unread count shown in nav badge

4. Live Ops Tab

Real-time operations view showing: - **Agent Status** — All agents with current status (online/busy/offline) - **Task Pipeline** — Tasks flowing through PENDING → RUNNING → DONE/FAILED - **Live Updates** — Auto-refreshes every 10 seconds

5. Services Tab

Shows your tier's included services with honest status:

STATUS	MEANING
 Active	Service is built and running
 Setup Required	Service is available but needs configuration

Click **Setup** on any service to request activation. A task is created and assigned to the appropriate agent automatically.

Service Agent Mapping

SERVICE TYPE	ASSIGNED AGENT
Invoice Processing	ASSEMBLY
Lead Qualification	ASSEMBLY

SERVICE TYPE	ASSIGNED AGENT
Customer Support	CHATTY
Document Classification	ASSEMBLY
Report Generation	ASSEMBLY
Knowledge Base	ATLAS
Compliance Audit	JURIS
Infrastructure	ASSEMBLY

6. Tasks Tab

View all tasks with: - Task ID, type, display name - Assigned agent - Status (PENDING, RUNNING, DONE, FAILED) - Priority - Created/completed timestamps - Error messages (if failed)

Click any task for detail view.

7. Activity Tab

Real audit trail combining: - Task lifecycle events (created, started, completed, failed) - Deliverable uploads - Login/logout events - PIN changes - Data exports

Each entry shows: icon, title, detail, timestamp, and task ID (if applicable).

8. Search

How to Search

1. Click the **search bar** in the navigation (desktop) or below nav (mobile)
2. Type **3+ characters**
3. Results appear in a dropdown panel, grouped by:
 - **Tasks** — Matching task names, descriptions, types
 - **Messages** — Matching chat message content
 - **Activity** — Matching activity log entries
4. **Click a result** to navigate to the relevant tab
5. **Click X** or click outside to close

Search Performance

- Queries execute in <100ms
- 300ms debounce (search runs after you stop typing)
- Results limited to 20 per category

9. Docs Tab

Downloadable documentation:

DOCUMENT	VERSION	PAGES	UPDATED
Quick Start Guide	v6.0	~12	2026-06-29
Dashboard User Guide	v4.0	~20	2026-06-29
Service Manual	v6.0	~25	2026-06-29
Architecture Overview	v4.0	~15	2026-06-25
Mobile Access Guide	v2.0	~8	2026-06-25
Enterprise Deployment Guide	v1.0	~10	2026-06-22

Click any document to view in-browser as PDF.

10. Settings Tab

Account Info

- Client ID, name, email, tier
- Login count, last login
- Onboarding status

PIN Management

- **Change PIN** — Enter current + new PIN. All existing tokens are immediately revoked. You'll need to log in again.
- **Forgot PIN** — Redirects to forgot PIN flow

Data Export

- **Download My Data** — Exports a ZIP file with:
 - `tasks/tasks.json` — All task history
 - `chat/conversations.json` — All conversations with messages
 - `deliverables/` — All uploaded files
 - `settings/client.json` — Account configuration
 - `README.txt` — Format guide

Your data is yours. Export it anytime, no questions asked.

11. Mobile Access

The dashboard is fully mobile-responsive:

- **Hamburger menu** — Tap ≡ to open/close nav
- **Touch-optimized** — Larger tap targets, swipe-friendly

- **iOS Safari** — If `.ts.net` URL shows certificate warning, use direct IP workaround
- **Search** — Search bar appears below nav on mobile

12. Security Best Practices

- Use a **6+ digit PIN** (not 4 digits)
- **Change PIN regularly** — Settings → Change PIN
- **Log out** from Settings when using shared devices
- **Export your data** before leaving the platform
- **Check Integration Health** if something seems wrong
- **Monitor Activity tab** for unauthorized access

API Reference

Authentication

All endpoints (except login and health check) require:

```
Authorization: Bearer <token>
```

Key Endpoints

METHOD	ENDPOINT	PURPOSE
POST	/api/auth/login	Login with Client ID + PIN
POST	/api/auth/register	First-time PIN setup
POST	/api/auth/change-pin	Change PIN (auth required)
POST	/api/auth/forgot-pin	Request PIN reset
POST	/api/auth/logout	Revoke current token
GET	/api/portal/status	Dashboard overview + metrics + trust
GET	/api/portal/integrations	Integration health status
GET	/api/portal/search?q=	Universal search
GET	/api/portal/tasks	Task list
GET	/api/portal/services	Tier services
GET	/api/portal/activity	Activity log
GET	/api/portal/deliverables	Deliverable files list
POST	/api/export/data	Export all data as ZIP
GET	/api/chat/conversations	List conversations
POST	/api/chat/conversations	Create conversation

METHOD	ENDPOINT	PURPOSE
GET	/api/chat/conversations//messages	Get messages
POST	/api/chat/conversations//messages	Send message
GET	/api/chat/poll	Poll for updates
