SAOS Changes — July 5, 2026

Date: 2026-07-05

Session: 20:19 - 00:35 CDT

Status:  ALL ORACLE PRIORITIES P1-P5 COMPLETE + Command Center v2.0

Summary

Completed all 5 Oracle priorities for SAOS enterprise hardening, upgraded the Systack Command Center to v2.0 with full security/compliance integration, and generated 3 new PDFs. SAOS is now enterprise-ready.

Changes

P1: Enterprise Hardening (Completed earlier this session)

- **MFA:** TOTP RFC 6238, 4 endpoints, recovery codes
- **RBAC:** 5 roles (customer, support, billing, ops, admin), permission decorators
- **Rate Limiting:** 8 per-endpoint configs with HTTP headers
- **Security Architecture v1.0 PDF** generated

P2: Backup Verification + Restore Drills

- **New script:** `scripts/backup_verify.py`
- **New DB table:** `backup_log` (tracks backups with checksums, RPO/RTO)
- **3 API endpoints:** `backup-log`, `backup/run`, `backup/rpo-rto`
- **Verified:** 166MB backup, 3s total, all 5 checks passed
- **RPO:** 24 hours | **RTO:** 6 minutes
- **New PDF:** Backup & Recovery Guide v1.0

P3: Security Events Dashboard

- **New DB table:** `security_events` (failed logins, MFA failures, rate limit hits, access denials)
- **Auto-logging:** Extended `log_audit` to automatically create security events on auth failures
- **3 API endpoints:** list with filters, 30-day aggregated stats, resolve event
- **Statistics:** by type, by severity, top offending IPs, critical unresolved

P4: Admin Console Hardening + Audit Export

- **New DB table:** `audit_exports` (chain of custody for audit exports)
- **3 API endpoints:** full audit trail with filtering, ZIP export with SHA-256 checksums, client-specific audit reports
- **ZIP exports include:** `audit_log.json`, `security_events.json`, `export_summary.json`

P5: Compliance Package

- **New DB table:** `compliance_policies` (5 default policies inserted)
 - Information Security Policy
 - Data Retention Policy
 - Incident Response Procedure
 - Privacy & Data Protection Policy
 - Access Control Policy

- **New DB table:** `incident_log` (P1-P4 severity, full lifecycle tracking)
- **6 API endpoints:** policies list, policy by type, incidents list, create incident, resolve incident, PUBLIC trust center
- **New PDFs:** Compliance & Trust Center v1.0, Security Architecture v2.0

Command Center v2.0

- **8 tabs:** Overview, Infrastructure, Clients, Security, Backup, Compliance, Audit, Alerts
- **7 new API endpoints:** security-events, backup-status, compliance, audit-trail, client detail, services-health (live), alerts (real data)
- **Live service health checks:** Actual HTTP probes to each service (9/9 = 100%)
- **Client detail panel:** Enterprise readiness score (MFA, role, onboarding, VPS, Tailscale)
- **Fixed:** Invoice Dashboard false alarm (uses `/api/summary` not `/api/health`)

Documentation

- **Security Architecture v2.0** PDF (459KB) — replaces v1.0, covers ALL P1-P5
- **Compliance & Trust Center** PDF (237KB) — public-facing compliance summary
- **Backup & Recovery Guide** PDF (246KB) — backup strategy, restore procedures, DR scenarios
- **Total PDFs:** 14 (was 12)

Bug Fixes

- Fixed duplicate `@app.route('/api/auth/login')` decorator
- Fixed Invoice Dashboard health check false alarm
- Fixed CORS — added `*.ts.net` for Tailscale MagicDNS

Database Schema Changes

6 new tables: 1. `backup_log` — backup history with verification 2. `security_events` — security event tracking 3. `audit_exports` — audit export chain of custody 4. `compliance_policies` — compliance policy documents 5. `incident_log` — incident response tracking

API Endpoints Added

Customer Portal (15 new): - P2: `/api/admin/backup-log` , `/api/admin/backup/run` , `/api/admin/backup/rpo-rto` - P3: `/api/admin/security-events` , `/api/admin/security-events/stats` , `/api/admin/security-events/<id>/resolve` - P4: `/api/admin/audit-log` , `/api/admin/audit/export` , `/api/admin/audit/client/<id>` - P5: `/api/compliance/policies` , `/api/compliance/policies/<type>` , `/api/compliance/incidents` (GET+POST), `/api/compliance/incidents/<id>/resolve` , `/api/compliance/trust-center`

Command Center (7 new): - `/api/fleet/security-events` , `/api/fleet/backup-status` , `/api/fleet/compliance` - `/api/fleet/audit-trail` , `/api/fleet/clients/<id>` , `/api/fleet/services-health` , `/api/fleet/alerts` (upgraded)
