Catering Lead System (Utopia Deli) — Documentation

Automation ID: catering-lead

Version: 2.1

Status: live — needs full documentation

Built: 2026-06-08

Last Updated: 2026-06-11

Owner: Utopia Deli

Builder: SOL

1. Executive Summary

What It Does

5-step catering/event lead capture form with automatic scoring, email response, and SQLite logging. Identifies high-value leads and responds immediately with tailored information.

Business Value

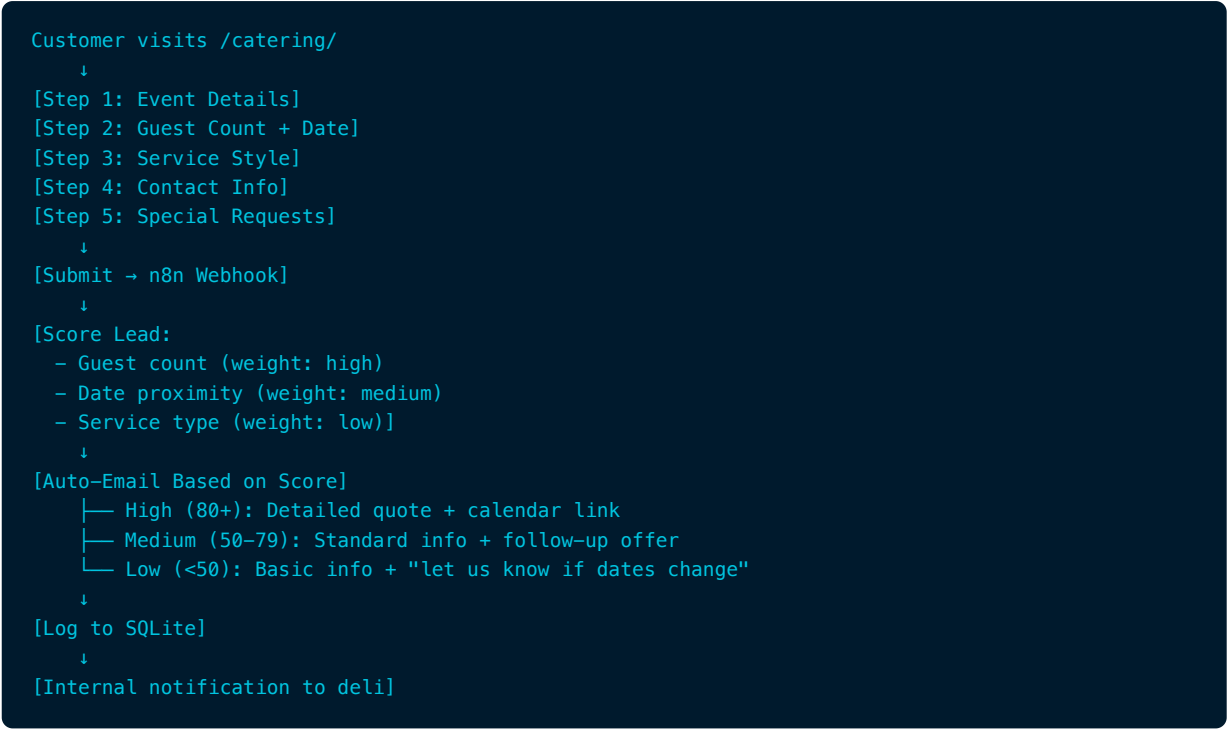

METRIC	BEFORE	AFTER
Lead response time	Hours/days	< 5 minutes
Lead qualification	Manual	Automatic scoring
Data collection	Phone/email back-and-forth	Single form

URL

- <https://order.theutopiadel.com/catering/>

2. System Architecture

Flow Diagram

Components

COMPONENT	TECHNOLOGY	PURPOSE
Frontend	HTML/CSS/JS	5-step form
Validation	catering-form.js	Field validation
Webhook	n8n	Receives submission
Scorer	n8n Code Node	Calculates lead score
Responder	n8n Email	Auto-response based on score
Database	SQLite	Lead storage

3. Technical Specifications

Lead Scoring

FACTOR	WEIGHT	CALCULATION
Guest count	40%	>100 = max, 50-100 = med, <50 = low
Date proximity	30%	<2 weeks = max, 2-4 weeks = med, >4 weeks = low
Service type	20%	Full service = max, Drop-off = low
Budget mentioned	10%	Yes = bonus

Payment Policy

- 50% deposit when invoice sent to book event
- Balance due 2 weeks prior to event
- Events within 2 weeks: full payment upfront

4. Configuration

Webhook

- **URL:** POST `https://utopia-api.systack.net/webhook/utopia-deli-catering-v2`
- **Method:** JSON payload

Database

- **File:** `~/openclaw/workspaces/sol/utopia-deli-catering.db`
- **Table:** `catering_leads`

5. Operational Runbook

Daily Checks

- ☐ New leads in last 24h
- ☐ Auto-emails sent successfully
- ☐ High-score leads flagged for personal follow-up

6. Build Log

Phase 1: Core Form (2026-06-08)

- Built 5-step HTML form
- Added validation logic
- Connected to n8n webhook

Phase 2: Scoring + Response (2026-06-08)

- Added lead scoring algorithm
 - Built conditional email templates
 - Connected SQLite logging
-

Appendix: Quick Reference

```
START:    Verify webhook active + email templates correct
STOP:     Disable webhook in n8n
CHECK:    SQLite database for recent leads
FIX:      If emails not sending → check n8n execution log
ESCALATE: If form submissions failing → check frontend console
```
