1. Overview

Automated client onboarding system. When a new client signs, the system creates project folders, schedules kickoff calls, sends welcome emails, and notifies the team. Available in two tiers: Private (local everything) and Accelerate (Google Drive + Slack).

Templates: - templates/private/n8n-client-onboarding.json - templates/accelerate/n8n-client-onboarding.json

2. System Architecture

```
Client Signed (trigger)
  → Create project folder structure
  → Schedule kickoff call (calendar)
  → Send welcome email to client
  → Send credential setup guide
  → Notify team (Slack/SMS)
    → Create onboarding checklist
      → Timer: 48h follow-up
      → Timer: 1-week check-in
```

3. Tier Comparison

COMPONENT	PRIVATE	ACCELERATE
Project folders	Local filesystem	Google Drive
Kickoff calendar	Local CalDAV	Google Calendar
Welcome email	Local SMTP	Client SMTP
Team notify	SMS (Twilio)	Slack
Onboarding log	Postgres local	Postgres cloud VPS

4. Setup Process

Step 1 — Choose Tier

- **Private:** Client has on-premise hardware, zero cloud apps
- **Accelerate:** Client uses Google Workspace + Slack

Step 2 — Import Template

- Import appropriate JSON into n8n
- Configure credentials (SMTP, Google, Slack, Postgres)

Step 3 — Customize

- Update welcome email template with client branding
- Set kickoff call availability
- Configure project folder template

5. Onboarding Checklist (Automated)

- ☐ Project folder created
- ☐ Kickoff call scheduled
- ☐ Welcome email sent
- ☐ Credential setup guide sent
- ☐ Team notified
- ☐ 48h follow-up: check credential progress
- ☐ 1-week check-in: first automation live?

Internal document — do not share with clients.
