1. Overview

White-label booking system template. Booking form → payment (Stripe) → database logging → confirmation email. The foundation that gets customized per client. Available in Private and Accelerate tiers.

Templates: - templates/private/n8n-generic-booking.json - templates/accelerate/n8n-generic-booking.json

2. System Architecture

```
Customer visits booking page
  → Selects service + time slot
  → Enters contact info
    → Payment via Stripe
      → Booking logged to Postgres
        → Confirmation email sent
          → Internal notification
```

3. Tier Comparison

COMPONENT	PRIVATE	ACCELERATE
Payment	Stripe (client account)	Stripe (client account)
Booking log	Postgres local	Postgres cloud VPS
Notifications	SMS (Twilio)	Slack + email
Customer receipt	Local SMTP	SendGrid/GMail

4. Customization Points

ELEMENT	WHAT TO CHANGE
Services	Service types, durations, pricing
Time slots	Business hours, slot intervals

ELEMENT	WHAT TO CHANGE
Branding	Logo, colors, copy
Payment	Stripe credentials
Notifications	Email/SMS/Slack channels

5. Setup Process

Step 1 — Choose Tier

- Private: on-premise, zero cloud
- Accelerate: cloud Postgres, Slack, Google

Step 2 — Import + Configure

- Import workflow JSON into n8n
- Set Stripe credentials
- Configure Postgres connection
- Set notification channels

Step 3 — Deploy Frontend

- Customize booking form HTML/CSS/JS
- Deploy to client domain
- Point form to n8n webhook

Step 4 — Test

- Complete test booking
- Verify payment processes
- Check database logging
- Confirm notifications deliver

6. Integration Points

This template is the foundation for: - No-Show Prevention (adds deposit + reminders) - Smart Rebooking (adds cycle tracking) - CRM Lite (adds customer profiles) - Upsell Intelligence (adds dynamic upsells)

Internal document — do not share with clients.
