Workflow: Invoice Email Pipeline

Workflow ID: Ny4kzzf1bN4N0DGn

Name: “Systack Private — Invoice Email Pipeline”

Node 1 — IMAP Trigger

Type: IMAP Email Trigger

Monitors configured inbox for new emails.

Critical settings:

SETTING	VALUE
Format	resolved
Download attachments	true

⚠️ Format MUST be resolved — “shallow” drops attachments.

Node 2 — Filter: Has PDF Attachment?

Type: IF Node

Condition: `$json.mimeType === "application/pdf"`

⚠️ Check MIME type, NOT filename. Filename can be anything. MIME type identifies actual PDF content.

- **TRUE:** Continue to extraction

- **FALSE:** Skip (not an invoice)
-

Node 3 — Extract Attachment

Type: Extract Attachment Node

Binary key: attachment_0

⚠ **MUST** use attachment_0 — NOT attachment_. Wrong key = file not found.

Saves PDF to disk for API processing.

Node 4 — Call Invoice Parser API

Type: HTTP Request Node

Endpoint: POST https://invoices.systack.net/extract

Content-Type: multipart/form-data

Body: file=@invoice.pdf

Response (JSON):

```
{
  "vendor": "AT&T",
  "invoice_number": "12345",
  "date": "2026-06-01",
  "line_items": [
    {"name": "Wireless Plan", "qty": 1, "price": 85.00, "total": 85.00}
  ],
  "subtotal": 100.00,
  "tax": 8.50,
  "total": 108.50,
  "email_subject": "Invoice Summary",
  "email_html": "<table>...</table>"
}
```

⚠ Use Merge nodes before and after HTTP Request — HTTP Request drops all input data.

Node 5 — Log to Postgres

Type: Postgres Node

Inserts extracted invoice data:

- Vendor name
 - Invoice number
 - Date
 - Line items (as JSON)
 - Subtotal, tax, total
 - Timestamp
-

Node 6 — Send Summary Email

Type: Email Send (SMTP)

Sends summary to owner:

Subject: Invoice Processed: {{vendor}} – {{invoice_number}}

Body:

```
New invoice processed:
Vendor: {{vendor}}
Invoice #: {{invoice_number}}
Date: {{date}}
Total: ${{total}}

Items:
{{line_items}}
```

Node Chain Summary

```
IMAP Trigger (format=resolved)
  → IF: Has PDF Attachment? (mimeType check)
    → Extract Attachment (binary key: attachment_0)
      → HTTP Request: Call Parser API
        → Postgres: Log Invoice Data
          → Email: Send Summary to Owner
```

Error Handling

ERROR	DETECTION	RESPONSE
No PDF attachment	IF node (mimeType)	Skip email
Wrong binary key	Extract node fails	Check key is attachment_0
API down	HTTP timeout	Queue for retry
OCR failure	API returns partial data	Log for manual review
Postgres down	Insert fails	Alert, retry
