1. System Overview

The No-Show Prevention System reduces revenue loss from customers who book but don't show up. It combines deposit collection, automated reminders, and confirmation requirements to ensure slots are either used or released for resale.

Status: 🚧 PARTIAL — Core deposit + reminder infrastructure operational. Auto-release and frontend booking form not yet built.

2. What's Working ✅

Branch 1: Booking Creation + Database Insert

- **Status:** ✅ Live
- **What it does:** Captures new booking, inserts into `systack_noshow` database
- **Database:** PostgreSQL (`bookings` table, 15 columns)
- **Auth:** Trust (localhost)

Branch 2: Confirmation Email with Token

- **Status:** ✅ Live
- **What it does:** Sends confirmation email with unique token link
- **Token:** Validated on click, updates booking status
- **Email delivery:** Gmail SMTP (Support@systack.net) — delivering reliably

Branch 3: Confirmation Webhook Handler

- **Status:**  Live
 - **What it does:** Processes customer confirmation clicks
 - **Webhook:** `GET /systack-confirm-booking`
 - **Action:** Validates token, updates booking status to “confirmed”
-

Branch 4: T-24h Reminder Scheduler

- **Status:**  Tested — works
 - **What it does:** Sends reminder email 24 hours before booking
 - **Trigger:** Schedule trigger (5-minute interval for testing)
 - **Content:** Reminder + “Confirm or Cancel” button
-

Branch 5: T-2h Urgent Reminder

- **Status:**  Built, needs testing
 - **What it does:** Sends final reminder 2 hours before booking
 - **Trigger:** Schedule trigger (5-minute interval for testing)
 - **Content:** Urgent reminder + “I’m on my way” button
-

3. What’s Not Built

Branch 6: Auto-Release Unconfirmed Slots

- **Status:**  Queued — NOT BUILT
 - **What it needs to do:**
 - Check confirmation status at T-30min before booking
 - If unconfirmed: release slot for resale
 - Notify waitlist if exists
 - Flag for follow-up
-

Frontend Booking Form

- **Status:**  Queued — NOT BUILT
 - **What it needs:**
 - Customer-facing booking page at `systack.net/book`
 - Test form at `systack.net/test-book` (internal)
 - Deposit notice: “A 25% deposit is required to hold your slot”
 - Integration with Square for deposit collection
-

4. Technical Details

Database

FIELD	DETAIL
Name	systack_noshow
Type	PostgreSQL
Host	localhost (Phillip's MacBook)
Auth	Trust (no password for local)
Table	bookings (15 columns)

n8n Workflows

WORKFLOW	TRIGGER	STATUS
Create Booking	POST /systack-create-booking	Active
Confirm Handler	GET /systack-confirm-booking	Active
24h Reminder	Schedule (5 min test)	Active
2h Reminder	Schedule (5 min test)	Active (needs test)

Deposit Rules (Configured)

SERVICE VALUE	DEPOSIT %	MIN DEPOSIT	MAX DEPOSIT
< \$50	100%	\$10	\$50
\$50–\$150	50%	\$20	\$75
> \$150	25%	\$37.50	No max

5. Completion Criteria

- ☒ Booking created in database
- ☒ Confirmation email sent
- ☒ Confirmation link works (token validated)
- ☒ T-24h reminder sends
- ☐ T-2h reminder tested with real booking window
- ☐ Auto-release logic built and tested
- ☐ Frontend booking form deployed
- ☐ Test/prod environment separation

6. Known Gaps

GAP	IMPACT	PRIORITY
No auto-release	Unconfirmed slots not freed for resale	P1
No frontend form	Can't accept customer bookings yet	P1
T-2h untested	Final reminder reliability unknown	P2
No test/prod separation	Testing affects production data	P2
No waitlist system	Released slots not offered to waitlist	P3
