Utopia Deli — No-Show Prevention System

Internal Implementation Guide

Document ID: UD-NSHOW-IMPL-001

Version: 1.0

Status: Internal — Systack Only

Source System: Utopia Deli (Partial — Phase 1 complete, Phase 2 in progress)

Date: 2026-06-16

Builder: SOL / Assembly

Brand Reference

1. System Architecture

```
Booking Made
  → Deposit Required? → No → Proceed Normally
  → Yes → Collect Deposit via Square
    → Store in DB: status="pending"
      → Timer: T-24h → Send Reminder + Confirm/Cancel Button
        → Timer: T-2h → Send Final Reminder + "I'm on my way" Button
          → Customer Confirms?
            → Yes → Status: "confirmed" → Proceed
            → No → T-30min → Auto-release slot → Notify waitlist
```

2. Core Components

Database

FIELD	DETAIL
Name	systack_noshow
Type	PostgreSQL
Host	localhost
Auth	Trust (no password for local)
Table	bookings (15 columns)

Key columns:

COLUMN	TYPE	PURPOSE
booking_id	TEXT PK	Unique booking identifier
customer_email	TEXT	For reminders
customer_phone	TEXT	Optional SMS
slot_datetime	TIMESTAMP	When booking is scheduled
deposit_amount	INTEGER	In cents
status	TEXT	pending/confirmed/unconfirmed/released
confirmation_token	TEXT	Unique token for confirm/cancel links
reminder_24h_sent	BOOLEAN	Deduplication
reminder_2h_sent	BOOLEAN	Deduplication

n8n Workflows

WORKFLOW	TRIGGER	STATUS
Create Booking	POST /systack-create-booking	✅ Active
Confirm Handler	GET /systack-confirm-booking	✅ Active
24h Reminder	Schedule Trigger	✅ Active
2h Reminder	Schedule Trigger	📅 Built, needs test
Auto-Release	Schedule Trigger	🔥 NOT BUILT

3. Setup Process (Replication)

Step 1 — Create Database

```
CREATE TABLE bookings (  
  booking_id TEXT PRIMARY KEY,  
  customer_name TEXT,  
  customer_email TEXT,  
  customer_phone TEXT,  
  service_type TEXT,  
  slot_datetime TIMESTAMP,  
  deposit_amount INTEGER,  
  total_value INTEGER,  
  status TEXT DEFAULT 'pending',  
  confirmation_token TEXT,  
  reminder_24h_sent BOOLEAN DEFAULT FALSE,  
  reminder_2h_sent BOOLEAN DEFAULT FALSE,  
  confirmed_at TIMESTAMP,  
  released_at TIMESTAMP,  
  created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP  
);
```

Step 2 — Configure Deposit Collection

- Square API integration for deposit holds
- Deposit rules based on service value:

SERVICE VALUE	DEPOSIT %	MIN
< \$50	100%	\$10
\$50–\$150	50%	\$20
> \$150	25%	\$37.50

Step 3 — Build Booking Webhook

Endpoint: `POST /CLIENT-create-booking`

Receives booking data, collects deposit, inserts into DB with `status="pending"`.

Step 4 — Build Confirmation Handler

Endpoint: `GET /CLIENT-confirm-booking?token=xxx`

Validates token, updates status:

- `status = "confirmed"` on confirm
- `status = "cancelled"` on cancel

Step 5 — Configure Reminder Schedulers

T-24h Reminder:

- Cron: runs periodically, checks for bookings 24h out
- Sends email with Confirm/Cancel buttons
- Sets `reminder_24h_sent = TRUE`

T-2h Reminder:

- Cron: runs periodically, checks for bookings 2h out
- Sends email with “I’m on my way” button
- Sets `reminder_2h_sent = TRUE`

Step 6 — Build Auto-Release (NOT YET BUILT)

Logic:

```
// For each booking where:
//   slot_datetime <= NOW() + 30 minutes
//   AND status = "pending"
//   AND reminder_2h_sent = TRUE

// Action:
//   status = "released"
```

```
// released_at = NOW()  
// Notify waitlist if exists
```

4. Configuration

Environment Variables

VARIABLE	DEFAULT	DESCRIPTION
NOSHOW_DEPOSIT_PERCENT	25	Default deposit %
NOSHOW_MIN_DEPOSIT	1000	Min deposit in cents (\$10)
NOSHOW_REMINDER_24H	true	Enable 24h reminder
NOSHOW_REMINDER_2H	true	Enable 2h reminder
NOSHOW_AUTO_RELEASE	true	Auto-release unconfirmed
NOSHOW_RELEASE_BUFFER	30	Minutes before slot

5. Testing

STEP	ACTION	VERIFY
1	Create test booking	Row in DB, status=pending
2	Click confirm link	Status changes to confirmed
3	Wait for T-24h window	Reminder email sent
4	Click cancel link	Status changes to cancelled
5	Don't confirm	Auto-release fires at T-30min

6. Critical Constraints

CONSTRAINT	DETAIL
Token uniqueness	Confirmation tokens must be cryptographically random
Deduplication	Check <code>reminder_sent</code> flags before sending
Time zone	All times in America/Chicago
Deposit handling	Deposits are holds, not charges — credited toward total
