1. System Architecture

```
Frontend (HTML/JS)
  → n8n Webhook
  → Validation + Normalization
  → Business Logic (hours, totals)
  → Order ID generation
  → Square Checkout Link
  → Payment (Square)
  → Square Webhook
    → n8n Confirmation Workflow
      → Kitchen Notification + Customer Email
```

2. Core Components

Frontend

- Static HTML ordering page
- Sends POST request to webhook
- Handles redirect to Square

n8n Workflow (Order Intake)

Workflow ID: 1WEM4rZxjhhy7ooM

Key nodes:

#	NODE	PURPOSE
1	Webhook (POST)	Receives order data from frontend
2	Validate + Normalize (Code Node)	Normalizes items, converts prices, handles dual schema
3	Hours Gate (Code Node)	Enforces business hours, handles ASAP
4	Generate Order ID	Creates unique order identifier
5	Build Payment Link	Constructs Square Checkout API request
6	Response Node	Returns payment URL to frontend

Square Integration

- Square Checkout API v2
- Payment link generated dynamically
- Webhook triggers confirmation workflow

Confirmation Workflow

Workflow ID: IW27pwPj5DBYQdcq

Handles:

- Payment verification
- Kitchen notification
- Customer email

3. Setup Process (Replication)

Step 1 — Create Webhook

- **Method:** POST
- **Path:** utopia-deli-html-order-v1
- **Mode:** responseNode

Step 2 — Add Validation Node

- Normalize items
- Convert prices to cents
- Handle dual schema (cents vs dollars)

Step 3 — Implement Hours Gate

- **Timezone:** America/Chicago
- Enforce Mon–Sat, 12:30–19:30

- Add ASAP handling (+30 minutes)

Step 4 — Generate Order ID

Format:

```
UD-YYYYMMDD-HHMMSS-RANDOM
```

Step 5 — Square Payment Link

- Use Square API
- Return URL to frontend

Step 6 — Response Node

Return:

```
{
  "success": true,
  "order_id": "UD-20260616-143022-4782",
  "payment_url": "https://square.link/u/xxxxx"
}
```

Step 7 — Confirmation Workflow

- Create second webhook for Square
- Validate signature
- Send notifications

4. Configuration Requirements

Credentials

CREDENTIAL	TYPE	PURPOSE
Square API	n8n credential	Payment link generation
SMTP (Gmail)	n8n credential	Email delivery
Twilio (SMS)	Optional	Kitchen SMS notifications

Environment Variables

VARIABLE	PURPOSE
SQUARE_WEBHOOK_SECRET	Validates Square webhook signatures

VARIABLE	PURPOSE
SQUARE_ACCESS_TOKEN	Square API authentication
SQUARE_LOCATION_ID	Square location identifier

5. Testing Procedure

STEP	ACTION	VERIFY
1	Submit test order	Webhook receives data
2	Confirm payment redirect works	Square link generated
3	Complete payment (sandbox)	Payment processes
4	Verify kitchen notification	Notification received
5	Verify confirmation email	Email delivered
6	Simulate failure (cancel payment)	No order created

6. Maintenance

- Monitor webhook activity
- Check email delivery
- Review Square logs
- Update menu manually in frontend

7. Critical Constraints

CONSTRAINT	DETAIL
Response order	Do not send webhook response before processing
Webhook mode	Use <code>responseNode</code> mode
Currency	Use cents, not floating dollars
JavaScript	Avoid ES6 spread in code nodes

Internal document — do not share with clients.
