1. Overview

Automated outreach sequencer that sends timed follow-up messages to leads generated by the Lead Scraper. Multi-step sequences with conditional branching based on response.

Workflow: `Green_Systems_-_Outreach_Sequencer.json`

2. System Architecture

```
Lead enters sequencer (status = 'new')
  → Step 1 (Day 0): Initial outreach email/DM
    → Response? → Move to 'responded', branch to human follow-up
    → No response?
      → Step 2 (Day 3): Follow-up #1 – different angle
        → Response? → Human follow-up
        → No response?
          → Step 3 (Day 7): Follow-up #2 – value add
            → Response? → Human follow-up
            → No response?
              → Step 4 (Day 14): Breakup email
                → No response → Status: 'dead'
```

3. Sequence Templates

Food Truck Pitch Sequence

STEP	DAY	MESSAGE TYPE
1	0	Intro: “We build online ordering for food trucks — here’s an example”
2	3	Value: “This truck increased orders 30% with our system”
3	7	Urgency: “Summer season is starting — ready to take online orders?”
4	14	Breakup: “If the timing isn’t right, we’ll check back next season”

Service Business Sequence

STEP	DAY	MESSAGE TYPE
1	0	Intro: “Automated booking + no-show prevention for [industry]”
2	3	Case study: “Here’s how [similar business] reduced no-shows 80%”
3	7	ROI: “Average client saves 10 hrs/week + \$500/mo”
4	14	Breakup: “Here’s our info if you ever want to explore this”

4. Configuration

VARIABLE	PURPOSE
SEQUENCE_TYPE	Which template to use
OUTREACH_CHANNEL	Email, DM, or both
RESPONSE_WINDOW_DAYS	Days to wait between steps

5. Lead Status Flow

new → contacted (Step 1 sent)
→ responded (reply received) → qualified → client
→ dead (no response after all steps)
