Review + Reputation Engine — Documentation

Automation ID: review-system**Version:** 1.0**Status:** draft — Oracle proposal, ready to build**Built:** N/A**Last Updated:** 2026-06-11**Owner:** Template for all service clients**Builder:** SOL (planned)

1. Executive Summary

What It Does

After every completed service, automatically requests a review. Positive reviews (4-5 stars) are routed to public platforms (Google, Yelp). Negative reviews (1-3 stars) are captured internally for private feedback and improvement.

Business Value

Metric	Before	After (Target)
Review collection rate	~5% (only motivated customers)	> 30% (system asks everyone)
Public review sentiment	Mixed (only extremes)	Mostly positive (filtered)
Negative feedback visibility	Public, hurts reputation	Private, actionable
Star rating improvement	Stagnant	+0.5 stars in 90 days

ROI Estimate

- Time saved: 2-3 hrs/week (no manual review requests)
- Reputation impact: Priceless — higher ratings = more customers
- Feedback quality: Structured data instead of random complaints

2. System Architecture

Flow Diagram

Components

Component	Technology	Purpose
Completion Trigger	n8n Webhook	Fires when service done
Delay Timer	n8n Wait Node	2-hour delay (not too soon)
Review Requester	n8n Email	Sends branded review link
Review Collector	HTML Form	In-app star rating + comment
Router	n8n IF Node	Positive → public, Negative → private

COMPONENT	TECHNOLOGY	PURPOSE
Public Redirect	URL redirect	Google/Yelp with pre-filled fields
Internal Logger	SQLite/Sheet	Stores all feedback
Alert System	n8n Email/SMS	Notifies owner of negative reviews

Data Flow

1. Service completion → 2-hour timer starts
2. Review request email sent with personalized link
3. Customer opens link → sees in-app form
4. Customer rates 1-5 stars
5. Positive (4-5): Ask to share publicly → redirect to Google/Yelp
6. Neutral (3): Ask for improvement feedback → internal only
7. Negative (1-2): Apologize + request details → internal + owner alert
8. All feedback logged → monthly report generated

3. Technical Specifications

Triggers

TRIGGER	TYPE	SCHEDULE/CONDITION
Service Completed	Webhook	POST /webhook/service-done
Review Submitted	Webhook	POST /webhook/review-submitted
Negative Alert	Immediate	IF rating <= 2

Review Form Fields

FIELD	TYPE	REQUIRED	NOTES
rating	1-5 stars	Yes	Determines routing
comment	Text	No	Required if rating <= 3
would_recommend	Yes/No	Yes	Net Promoter signal
improvement	Text	No	Only shown if rating <= 3
public_review	Text	No	Pre-filled Google/Yelp text

Routing Logic

RATING	ACTION	DESTINATION	OWNER ALERT?
5	"Please share on Google"	Google review URL	No
4	"Please share on	Google review URL	No

RATING	ACTION	DESTINATION	OWNER ALERT?
	Google”		
3	“Thanks, how can we improve?”	Internal feedback	Weekly digest
2	“We’re sorry, tell us more”	Internal + apology	Immediate email
1	“We want to make this right”	Internal + escalation	Immediate email + SMS

4. Configuration

Timing

SETTING	VALUE	RATIONALE
Delay after service	2 hours	Customer home, experience fresh
Follow-up if no response	3 days	Gentle reminder
Follow-up if still no response	7 days	Final ask
Negative response SLA	4 hours	Owner must respond to 1-2 star

Public Review URLs

PLATFORM	URL TEMPLATE
Google	<code>https://search.google.com/local/writereview?placeid={PLACE_ID}</code>
Yelp	<code>https://www.yelp.com/writeareview/biz/{BUSINESS_ID}</code>

Alert Recipients

RATING	RECIPIENTS	METHOD
1 star	Owner + Manager	Email + SMS
2 star	Owner	Email
3 star	Weekly digest only	Email (summary)

5. Operational Runbook

Daily Checks

- ☐ Reviews submitted yesterday: count + sentiment
- ☐ Negative reviews: responded to within SLA?
- ☐ Public review redirect success rate: > 70%

- ☐ Unresponded negative alerts: 0

Weekly

- ☐ Generate feedback summary report
- ☐ Identify top improvement themes
- ☐ Track star rating trend

Monitoring

METRIC	EXPECTED	ALERT IF
Review request open rate	> 40%	< 30%
Review completion rate	> 30%	< 20%
Public review conversion	> 60% of 4-5 star	< 40%
Negative review response time	< 4 hours	> 8 hours
Avg rating trend	Stable or up	Down 0.3+ stars

6. Build Log

Phase 1: Core Review Collection (Planned)

- **Date:** TBD
- **What:** Completion trigger → 2h delay → review request → form → store
- **Status:** ⌚ QUEUED (Phase 1 priority)

Phase 2: Smart Routing (Planned)

- **Date:** TBD
- **What:** Positive → public redirect, Negative → internal + alerts
- **Status:** ⌚ QUEUED

Phase 3: Owner Dashboard (Planned)

- **Date:** TBD
- **What:** Feedback summary, trend analysis, response tracking
- **Status:** ⌚ QUEUED

7. Client Handoff

What the Client Sees

- Weekly email: “This week: 12 reviews, 4.6 avg, 2 negative (both responded)”
- Customer view: Simple form, 30 seconds to complete
- No public shaming — negative feedback handled privately

What They Need to Know

- System asks EVERY customer (not just happy ones)
- Negative feedback comes to them first (not public)
- 4-5 star customers are encouraged to share publicly
- Response time to negative reviews matters for retention

What They Should NOT Touch

- Review timing — 2 hours is tested optimal
- Routing thresholds — changing star cutoffs affects public/private balance
- Public review URLs — wrong place ID breaks the flow

8. Future Enhancements

PRIORITY	IDEA	EFFORT	IMPACT
P1	SMS review requests	Low	High
P2	Photo/video review support	Medium	Medium
P3	Competitor rating comparison	Medium	Medium
P4	AI sentiment analysis of comments	High	Medium
P5	Automated owner response suggestions	High	High

Appendix: Quick Reference

START:	Enable completion webhook + verify review form URL
STOP:	Disable webhook (pauses new requests)
CHECK:	Weekly report → review count + sentiment
FIX:	If public redirects failing → check Google Place ID
ESCALATE:	If avg rating dropping → review recent feedback themes
